

References

Reference Citation

- Cite references in the text with author name/s and year of publication in parentheses (“Harvard system”):
 - One author: (Miller 1991) or Miller (1991)
 - Two authors: (Miller and Smith 1994) or Miller and Smith (1994)
 - Three authors or more: (Miller et al. 1995) or Miller et al. (1995)

Reference list

The list of references should only include works that are cited in the text and that have been published or accepted for publication. Personal communications and unpublished works should only be mentioned in the text. Do not use footnotes or endnotes as a substitute for a reference list.

- Include a **reference list at the end of each article** so that readers can make full use of the citations. References at the end of the book cannot be linked to citations in the chapters. Please do not include reference lists at the end of a chapter section, at the end of a book part, in a preface or an appendix.
- Include all works that are cited in the chapter and that have been published (including on the Internet) or accepted for publication. Personal communications and unpublished works should only be mentioned in the text. Do not use footnotes as a substitute for a reference list.
- Entries in the list must be listed alphabetically except in the numbered system of sequential citation. The rules for alphabetization are:
 - First, all works by the author alone, ordered chronologically by year of publication.
 - Next, all works by the author with a coauthor, ordered alphabetically by coauthor.
 - Finally, all works by the author with several coauthors, ordered chronologically by year of publication.
